STORMWATER POLLUTION

Car Wash Cartoon: Suggested Accompanying Text

It's no joke: taking your car to a certified car wash facility can help keep our waters clean! It's not something most of us would consider a form of pollution, but washing your car on a paved surface allows the soapy water and dirt from your car to quickly enter a storm drain. From there, it goes directly to local waters. Car wash facilities are required to recycle, collect, or dispose of the wash water safely. Help keep our waters clean: wash your car at a car wash or at least move it onto the lawn before you take out the hose!
