

Rain Barrel Purchasing Information

New England Rain Barrel

- Rain barrels are 55 gallon recycled plastic barrels.
- Offers discounted bulk rates to non-profit groups of \$68/barrel, depending on the town you live in.
 1. Contact New England Rain Barrel at 978-977-3155 to schedule a date and location for delivery. Sponsor chooses location with adequate parking and bathroom facilities.
 2. New England Rain Barrel will provide flyers and press releases for the sponsoring group.
 3. The sponsoring group chooses the best way get the word out (e.g. article in local paper, flyers at schools, community centers, etc.).
 4. Customers order directly through New England Rain Barrel. Customer support is available for questions via phone or email. VISA, MasterCard and personal checks are accepted.
 5. When orders are picked up, customers will be given written installation instructions, a quick demonstration and then the barrel will be loaded into their car.

From <http://www.nerainbarrel.com/Product.html>:

The New Englander is made from recycled barrels ranging in capacity from 55 to 60 gallons. It is intended to be used with gutters and downspouts to collect storm runoff. The New Englander uses solid brass fittings for the outlet and top overflow control valves, along with an aluminum screen louvered inlet to stop leaves and bugs from living (and breeding) in your pure rainwater. It comes complete with all hardware installed, and a five-foot starter hose with shutoff.

Great American Rain Barrel

- Rain barrels are 60 gallon recycled and retrofitted food barrels.
- Discounted bulk rates are available.
 1. Town would pre-market barrels.
 2. The town would then place one large bulk order; this lowers shipping costs.
 3. The town would designate a drop-off location for people to pick up the barrels.
 4. To contact Great American Rain Barrel call (800) 251-2352 or email info@greatamericanrainbarrel.com

From <http://www.greatamericanrainbarrel.com/>:

At 60 gallons our barrel is among the largest capacity rain barrels available today! It is also the best built and most durable with a wall thickness of 3/16". Resulting in a rigid, heavy duty rain barrel that will last virtually forever. Each UV protected polyethylene rain barrel is manufactured in the USA from a recycled shipping barrel that stands 39" tall by 24" wide and weighs 20 lbs. empty. The barrel comes complete with overflow fitting, drain plug, screw on cover, and a threaded spigot positioned 14" from ground level. Attach your garden hose to the spigot and water your garden or lawn, even wash your car. Our rain barrel arrives with simple instructions for fast and easy installation. For additional water storage simply link two and three barrels together with a short piece of 3/4" garden hose.
